Acnecide 10% w/w Gel

Uses

Topical therapy for the treatment of acne vulgaris.

Dosage

Adults and adolescents 12 years and over: before use, clean and dry skin carefully. Apply in a thin layer once daily, or as directed, to the affected areas. The extent of any drying or peeling may be adjusted by modifying the dosage schedule. It is recommended to initiate treatment with benzoyl peroxide 2.5% or 5% gel. If adequate results are not achieved with 5% gel and it is well tolerated, treatment with the 10% gel may be started.
